Jan Sprenger

June 1, 2021

The most famous philosophy paper of all times is Frege, “Über Sinn und Bedeutung”.

A classic of Bayesian inference was written by Rudolf Carnap (*Logical Foundations of Probability*). There are also more modern works in this direction (Sutto2021; Garber, “Old Evidence and Logical Omniscience in Bayesian Confirmation Theory”; Earman, *Bayes or Bust? A Critical Examination of Bayesian Confirmation Theory*).
